BS EN 61000-4-2:2009 looks at the immunity requirements and test methods for electrical and electronic equipment subject to static electric discharges. The standard also defines the ranges of test levels relating to different environmental and installation conditions, and establishes

# Access Free 61000 4 2 4 5 11 Update 2 12 2010 Ppt

test procedures. The main goal of BS EN 6100-4-2 is to set up a common and reproducible basis to evaluate the performance of electrical and electronic equipment when subjected to electrostatics.
