AEC CITES - African Elephant Coalition

African elephants are of the genus

Loxodonta (derived from Greek) and this

includes the two core species; the African

bush elephant and the African forest

elephant (which is smaller). 2. African

elephants can be differentiated from Asian

elephants from their more wrinkled skin,

their larger size, their larger ears which reach

up over their neck, their concave back

(Asian elephants have a straight back), and

having more rings on their trunks.
