Now we would like to dump eMMC partitions and read data from it.

This is mainly for debugging purpose for any field returned boards. E.g. I could read one of the partition in binary file and mount it

# File Type PDF Emmc Dump Read Done From Samsung

and read its data. e.g. take partition 20(which is ext4 partition), I could read it from u-boot or using Lauterbach debugger into filename say part20.bin
