DIVThe definitive guide to the composers, artists, bands, musical instruments, dances, and institutions of Cuban music./div

This book examines Cuban society through a study of its detective fiction and more particularly contemporary Cuban society through the novels of the author and critic, Leonardo Padura Fuentes. The author traces the development of Cuban detective writing in the light of the work of twentieth century Western European literary critics and philosophers including Raymond Williams, Antonio Gramsci, Terry Eagleton, Roland Barthes, Jean Paul Sartre, Michel Foucault, Jean François Lyotard and Jean Baudrillard in order to gain a better understanding of the social and historical context in which this genre emerged. The analysis includes discussion of the broader philosophical, political and historical issues raised by the Cuban revolution. The book concludes that the study of this popular genre in Cuba is of crucial importance to the scholar who wishes to reach as full an understanding of the social dynamics within that society as possible.

A History of the Spanish Language through Texts examines the evolution of the Spanish language from the Middle Ages to the present day. Pountain explores a wide range of texts from poetry, through newspaper articles and political documents, to a Bunuel film script and a love letter. With keypoints and a careful indexing and cross-referencing system this book can be used as a freestanding history of the language independently of the illustrative texts themselves.

This is the story of LSD told by a concerned yet hopeful father, organic chemist Albert Hofmann. He traces LSDs path from a promising psychiatric research medicine to a recreational drug sparking hysteria and prohibition. We follow Dr. Hofmanns trek across Mexico to discover sacred plants related to LSD, and listen in as he corresponds with other notable figures about his remarkable discovery. Underlying it all is Dr. Hofmanns powerful conclusion that mystical experience may be our planets best hope for survival. Whether induced by LSD, meditation, or arising spontaneously, such experiences help us to comprehend the wonder, the mystery of the divine in the microcosm of the atom, in the macrocosm of the spiral nebula, in the seeds of plants, in the body and soul of people. Now, more than sixty years after the birth of Albert Hofmanns problem child, his vision of its true potential is more relevant, and more needed, than ever.
