~~NCCN—Evidence-Based Cancer Guidelines: Oncology Drug~~  
The NCCN Guidelines for Testicular Cancer provide an evidence- and consensus-based treatment approach for the management of adult patients with seminomatous and nonseminomatous testicular GCTs. Testicular GCTs are sensitive to platinum-based chemotherapy, and patients have high cure rates even with metastatic disease.

~~Testicular Cancer, Version 2.2020, NCCN Clinical Practice~~  
Updates in Version 2.2016 of the NCCN Guidelines for Testicular Cancer from Version 1.2016 include: TEST-5  Post-chemotherapy, for no residual mass or residual mass  $\leq$ 3 cm and normal markers, the follow-up was redirected to Table 3 on TEST-A 2 of 2. TEST-A 2 of 2  Follow-up for Seminoma

~~NCCN Clinical Practice Guidelines in Oncology (NCCN)~~  
The NCCN Guidelines are a statement of consensus of the authors regarding their views of currently accepted approaches to cancer treatment. The recommendations regarding the uses and indications in the NCCN Compendium have been derived directly from the NCCN Guidelines.

~~NCCN Clinical Practice Guidelines in Oncology~~  
Practice Guidelines in Oncology: Testicular Cancer. Version 1.2015. Accessed at www.nccn.org/professionals/physician\_gls/pdf/testicular.pdf on December 9, 2015. Olofsson SE, Tandstad T, Jerkeman M, et al. Population-based study of treatment guided by tumor marker decline in patients with metastatic nonseminomatous germ cell tumor: A report from the Swedish-Norwegian Testicular Cancer Group.

~~Testicular Cancer Reference | NCCN Guidelines~~  
for Testicular Cancer.
