Object Oriented Gui Application Development
In computing, an object-oriented user interface is a type of user interface based on an object-oriented programming metaphor. In an OOUUI, the user interacts explicitly with objects that represent entities in the domain that the application is concerned with. Many vector drawing applications, for example, have an OOUUI – the objects being lines, circles and canvases. The user may explicitly select an object, alter its properties, or invoke other actions upon it. If a business application has ...
